English
PG Pro™ Peripheral Microcatheter
Instructions for Use

Carefully read all instructions prior to use.

DEVICE DESCRIPTION

The PG Pro Microcatheter is a single lumen catheter designed to be used as a peripheral vascular catheter in patients with peripheral vascular disease. The semi-rigid proximal section of the catheter is designed to be used in conjunction with the distal hydrophilic polymer coated section for peripheral vascular procedures such as angioplasty and stenting.

The outer surface of the Microcatheter is coated with a hydrophilic polymer to increase lubricity. A kink rating on the Microcatheter hub is used to indicate the attachment of accessories.
